Authors : Zhensong Qian and Oliver Schulte

Title : Learning Bayes Nets for Relational Data With Link Uncertainty

Dear Zhensong,

due to some inquiries that we received recently, we would like to clarify some issues about the submission of the camera-ready version of your contribution to the GKR2013 Springer post-proceedings.

1. FINAL PAPER: Please submit the files belonging to your camera-ready paper using your EasyChair account, selecting the role proceedings author (LNCS proceedings)

Follow the instructions after the login for uploading two files:

(a) a zipped file containing all your LaTeX sources and

(b) PDF version of your camera-ready paper.

Please also make check that you followed strictly the author instructions of Springer-Verlag when preparing the final version:

<http://www.springer.de/comp/lncs/authors.html>

Our publisher has recently introduced an extra control loop: once data processing is finished, they will contact all corresponding authors and ask them to check their papers. We expect this to happen shortly before the printing of the proceedings. At that time your quick interaction with Springer-Verlag will be greatly appreciated.

2. COPYRIGHT: Please upload a signed and completed copyright form to us as soon as possible. The Springer copyright forms can be found at

http://www.springer.com/cda/content/document/cda_downloaddocument/copyrigh.pdf?SGWID=0-0-45-154182-0

It is sufficient for one of the authors to sign the copyright form. You can scan the form into PDF or any other standard image format. Please enter "Proceedings of GKR 2013" as book title and "Croitoru et al." as volume editors.

We apologize for the late notice and greatly appreciate your cooperation in these matters. Please accomplish your submission by Wednesday, 23rd of October, 23:59 PST. Thank you again for your contribution to GKR@IJCAI 2013.

Sincerely,
The GKR2013 OC
